

Business Insights Report

Sales Data Analysis Project

Prepared using Excel, SQL & Power BI Dashboard

1. Region Generating the Highest Revenue

Based on the Power BI dashboard analysis, the East Region generated the highest revenue, contributing approximately 113,818 in total sales. The region demonstrated strong and consistent sales performance throughout the year.

- East region recorded the highest sales revenue.
- Customer demand remained strong across multiple categories.
- The region contributed significantly to overall business growth.

Business Impact: The East region should remain a strategic focus area for marketing, inventory planning, and customer retention initiatives.

2. Most Profitable Product Category

Electronics emerged as the product category with the highest profit margin, making it the strongest contributor to profitability.

- Electronics achieved the highest profit margin among all categories.
- The category maintained strong sales and profitability.
- Profit contribution exceeded other categories consistently.

Business Impact: The company should continue promoting Electronics products and explore opportunities to expand this category.

3. Are Discounts Affecting Profitability?

Analysis indicates that higher discounts reduce overall profitability. Orders with larger discounts generated lower average profits compared to orders with moderate discounts.

- Higher discounts resulted in lower profit margins.
- Aggressive discounting reduced earnings.
- Moderate discounts performed better than excessive discount strategies.

Business Impact: Discount policies should be carefully managed to balance sales growth and profitability.

4. Seasonal Sales Trend

Monthly sales analysis revealed clear seasonal patterns. August recorded the highest sales performance, followed by February and December, while January and July experienced comparatively lower sales volumes.

- Sales peaked during August, February, and December.
- Customer purchasing activity increased during peak periods.
- Seasonal demand influenced overall business performance.

Recommendation: Inventory planning and promotional campaigns should be aligned with peak sales periods.

5. Key Recommendations for Management

- Focus investment on high-performing regions.
 - Expand profitable categories such as Electronics.
 - Optimize discount strategies to protect profit margins.
 - Strengthen engagement with Consumer segment customers.
 - Prepare inventory and logistics before seasonal demand peaks.
-

Conclusion

This project successfully demonstrated the complete analytics workflow, including data preparation, SQL analysis, Excel-based reporting, and Power BI dashboard development. The insights generated from the analysis can support better business decisions and help improve long-term business performance.
